Intelligent Solutions for Smarter Policing

IN-SYNCH RMS

Product Features and Benefits

In-Synch RMS includes a wide array of powerful investigative tools, statistical and analytical reports, and integrated data-sharing. Automated connections to other important law enforcement systems maximize your department's overall efficiency.

Investigative Tools

The system includes self-building master indexes and powerful search and link analysis tools.

- Master Name Index
- Master Org Index
- Master Address Index
- Master Vehicle Index
- Master Phone Index
- Link Finder
- Query

Reports

More than 75 statistical and analytical reports are built into the RMS.

- Arrest
- Call
- Case
- Citation
- Monthly Stats
- NIBRS
- Property
- UCR
- Warrants

Data-Sharing

With In-Synch RMS' integrated regional data-sharing system, agencies can share summary master index information which significantly increases the effectiveness of fighting and solving crime for each cooperating department.

Connections with Complementary Systems

In-Synch Systems routinely integrates with leading Public Safety software to provide seamless interfaces that foster efficiency and minimize the duplication of data entry.

- CAD (computer aided dispatch)
- Booking
- Court Software
- Jail Management
- Mobile Parking Applications
- E-Citations
- Body Cameras
- Crime Mapping and Analysis
- Citizens Based Reporting
- Enabling Access for:
  - Parole
  - Probation
  - District Attorney's Office

In-Synch RMS is a fully-featured Records Management solution that will enable your department to manage case files and produce professional reports. In-Synch RMS users can work either in the office or the field, thereby reducing operating costs while increasing agency efficiency.

In-Synch RMS core modules include:

Call Log

- Write and review basic reports about calls-for-service including: dates/times, assigned officer(s), location, contacts, vehicles, property, and photos.
- Data entered in Call Log automatically pre-populates other RMS forms, saving time, increasing accuracy, and eliminating the duplication of data entry.
- Integrates with many CAD (Dispatch) systems for improved efficiency.

Case Builder and Administrative Review

- Create media-rich case files that include: photos, audio, video, arrests, narratives, evidence, external files, and custom fields.
- Share, delegate, and manage the workflow of cases and supplemental reports.
- Record and validate UCR and NIBRS data for State and Federal reporting.

Person Management

- Add, edit, or view person information including: addresses, phone numbers, driver's license information, photos, physical description, scars, marks, tattoos, associations, and affiliations that contribute to an extensive Master Name Index.
- Automatic notifications available for: suspects, arrestees, weapons permits, parole, probation, warrants, registrations, and officer safety and special handling warnings.
- Information can be updated without the need to recreate an entire new person record.

Link Finder

- A query and link analysis tool used to visually investigate connections among items in the RMS.
- Discover patterns or direct and indirect relationships that are commonly the "nuggets" of information that lead to solving crimes.
- Access Call, Case, and Master Index reports within the Link Finder module.

Module Summary

In-Synch RMS is comprised of modules for recording various types of Law Enforcement information.

ADDRESS MANAGEMENT - Quickly look up address information, including an extensive Master Address Index.

ADMINISTRATIVE REVIEW - Review cases at any stage of a departmental workflow. Create UCR/NIBRS/CLERY reports.

CALL LOG - Write and review basic reports about calls-for-service. Integrates with many CAD systems for improved efficiency.

CASE BUILDER - Create media-rich case files that include photos, multi-officer narratives, arrests, evidence, external files, and custom fields.

CITATIONS – Record Traffic Citations, Criminal Citations, Traffic Warnings, and Parking Tickets.

CODE MANAGEMENT –Manage crime codes, associated fines, charging guidelines, state reporting classifications, and charging text.

CONFIDENTIAL INFORMANTS - Track sensitive informants by number. Includes involvement and payment tracking.

COURT PAPERS - Record, track, and print document details, and paper service history for civil and criminal documents such as subpoenas, writs, petitions, warrants, orders, or other custom paper types.

CUSTODY MANAGEMENT - Track the details of temporary custody assignments, including short-term detainments and transports.

DAILY LOG - Officers can record their daily activity information.

FLEET MANAGEMENT - Track details about your fleet. Includes maintenance schedules and quick statistics.

LINKFINDER - Visually investigate connections among items in the RMS.

MASTER PHONE INDEX - Quickly find people and organizations by phone number.

ORGANIZATION MANAGEMENT - Quickly look up organization information, including an extensive Master Organization Index.

PAWN SHOP – Record pawn transactions. Track hotlist items.

PERSON MANAGEMENT - Quickly look up person information, including an extensive Master Name Index.

PERSONNEL MANAGEMENT - Track training, equipment, notations, and other personnel information.

PHOTO MANAGEMENT - Create photo lineups, missing person and wanted person posters. Print any system photos.

PROPERTY ROOM MANAGEMENT - Manage the inventory and custody chain of your property. Includes barcode support.

QUERY - Create advanced queries of information within the RMS.

REPORTS - Generate statistical reports on calls, cases, arrests, citations, warrants, etc.

VEHICLE MANAGEMENT - Quickly look up vehicle information, including an extensive Master Vehicle Index.

WARRANT & REGISTRATION MANAGEMENT - Enter or view a person's warrants, information on drug, sex, or arson offenses, parole, probation, and incarceration records, or carry concealed weapons permits.

IN-SYNCH SYSTEMS
"ALWAYS WORKING FOR YOU"

Our clients value the technology we provide as essential tools for better policing. Whether you are a state-wide, county-wide, or a one-person agency, In-Synch RMS' decentralized database architecture, investigative tools, data-sharing system, and customer service provide the foundation for a safer community. In-Synch Systems serves more than 250 public safety and private security agencies throughout the United States and Canada.
